

Programming Experience 2016 (PX/16) Workshop

Co-located with ECOOP 2016 in Rome

July 18 or 19, 2016

Abstract

Imagine a software development task. Some sort of requirements and specification including performance goals and perhaps a platform and programming language. A group of developers head into a vast workroom.

<crossfade to developers exiting the vast workroom>

The *Programming Experience Workshop* is about what happens in that room when one or a couple of programmers sit down in front of computers and produce code, especially when it's exploratory programming. Do they create text that is transformed into running behavior (the old way), or do they operate on behavior directly ("liveness"); are they exploring the live domain to understand the true nature of the requirements; are they like authors creating new worlds; does visualization matter; is the experience immediate, immersive, vivid and continuous; do fluency, literacy, and learning matter; do they build tools, meta-tools; are they creating languages to express new concepts quickly and easily; and curiously, is joy relevant to the experience?

Correctness, performance, standard tools, foundations, and text-as-program are important traditional research areas, but the experience of programming and how to improve and evolve it are the focus of this workshop.

Submissions

Submissions are solicited for Programming Experience 2016 (PX/16). The thrust of the workshop is to explore the human experience of programming—what it feels like to program, or more accurately, what it should feel like. The technical topics include exploratory programming, live programming, authoring, representation of active content, visualization, navigation, modularity mechanisms, immediacy, literacy, fluency, learning, tool building, and language engineering.

Submissions by academics, professional programmers, and non-professional programmer are welcome and can be in any form and format, including but not limited to papers, presentations, demos, videos, panels, debates, essays, writers' workshops, and art. Presentations will be between 30 min and one hour, depending on quality, form, and relevance to the workshop. Submissions directed toward publication should be so marked, and the program committee will engage in peer review for all such papers. Video publication will be arranged.

All artifacts are to be submitted via EasyChair. Papers and essays must be written in English, provided as PDF documents, and follow the ACM SIGPLAN Conference Format (10 pt Times New Roman, numeric citation style).

There is no page limit on submitted papers and essays. It is, however, the responsibility of the authors to keep the reviewers interested and motivated to read the paper. Reviewers are under no obligation to read all or even a substantial portion of a paper or essay if they do not find the initial part of it interesting.

Format

Paper presentations, presentations without papers, live demonstrations, performances, videos, panel discussions, debates, writers' workshops, art galleries, dramatic readings.

Review

Papers and essays labeled as publications will undergo standard peer review; other submissions will be reviewed for relevance and quality; shepherding will be available.

Important dates

Submissions: **April 15, 2016 (anywhere in the world)**

Notifications: **May 13, 2016**

PX/16: July 18 or 19, 2016

Publication

Papers and essays accepted through peer review will be published as part of ACM's Digital Library; video publication on Vimeo or other streaming site; other publication on the PX workshop website.

Organizers

Robert Hirschfeld

HPI, University of Potsdam, Germany

Richard P. Gabriel

Dreamsongs and IBM Almaden Research Center, USA

Hidehiko Masuhara

Tokyo Institute of Technology, Japan

Program committee

Carl Friedrich Bolz, King's College London, UK

Gilad Bracha, Google, USA

Andrew Bragdon, Twitter, USA

Jonathan Edwards, MIT, USA

Jun Kato, AIST, Japan

Cristina Videira Lopes, UC Irvine, USA

Yoshiki Ohshima, Viewpoints Research Institute, USA

Michael Perscheid, SAP Innovation Center, Germany

Guido Salvaneschi, TU Darmstadt, Germany

Marcel Taeumel, HPI, University of Potsdam, Germany

Alessandro Warth, SAP Labs, United States
